PROFESSIONAL SUMMARY

Cloud-focused IT support professional with experience across Microsoft Azure, Microsoft 365, hybrid identity, endpoint support, and on-premises administration. Combines senior Azure support experience with hands-on higher education service desk work supporting accounts, devices, classroom technology, access issues, documentation, and escalations across cloud and local infrastructure.

EDUCATION

Bachelor of Science: Computer Science (In Progress) | Western Governors University | Started February 2026

Associate: Cyber Security | Pikes Peak State College | May 2021

High School Diploma | James Irwin Charter High School | May 2012

CERTIFICATIONS

CompTIA Security+ | Expires 06/2027

Microsoft Azure Certifications: AZ-305 Azure Solutions Architect Expert, AZ-104 Azure Administrator, AZ-500 Azure Security Engineer

EXPERIENCE

IT SERVICE DESK SPECIALIST | PIKES PEAK STATE COLLEGE | 07/2025 - Present

- Provide frontline and escalated IT support for faculty, staff, and students across Microsoft 365, Windows endpoints, account access, classroom/shared device workflows, printing, Outlook, Teams, Zoom/Webex, and campus applications.
- Administer and troubleshoot hybrid identity and access issues using Active Directory Users and Computers (ADUC), Entra ID, Exchange Online, group membership, licensing, mailbox/recipient checks, password/account recovery, and related escalation paths.
- Support endpoint and device management workflows involving Intune/Autopilot, Windows imaging/provisioning concepts, BitLocker, shared devices, docking stations, printers, and hardware troubleshooting for Surface, Lenovo, HP, and campus lab/classroom systems.
- Investigate email, security, and collaboration issues including junk/spam filtering, external sender behavior, distribution groups, dynamic distribution lists, mailbox visibility, Teams/Outlook calendar behavior, and M365 service configuration questions.
- Create and improve internal documentation, ticket notes, user-facing guides, request forms, and process templates to make troubleshooting steps, escalation requirements, and service expectations clearer for technical and non-technical audiences.
- Collaborate with internal IT teams, CCCS contacts, vendors, and campus departments to triage complex incidents, validate policy requirements, and coordinate service restoration or escalation when issues exceed local administrative scope.
- Translate complex technical findings into clear customer communication, balancing security/compliance needs with practical support for students, faculty, staff, and external partners.

CLOUD ENGINEER | CYBER HUSKY | 03/2025 - 07/2025

- Helped design, implement, and manage Azure environments with an emphasis on secure, reliable, and scalable infrastructure.
- Deployed Azure resources using the Azure portal, Azure CLI, and infrastructure-as-code practices, primarily Terraform.
- Supported Azure-related incidents involving performance, availability, security, and hybrid/cloud integration concerns.
- Collaborated on cloud migration planning, operational documentation, best practices, and internal Azure Sentinel deployment concepts.

SUBJECT MATTER EXPERT | TEK EXPERTS | 07/2021 - 03/2025

- Supported Microsoft Azure services including App Service, Functions, Container Apps, Static Web Apps, App Service Certificates, App Service Domains, App Configuration, and App Service Environment.
- Acted as final escalation resource across Azure Web App support teams, reviewing complex Tier 2 and Tier 3 cases and guiding resolution strategy.
- Improved collaboration across Azure support teams and Partner Technical Advisors by sharing service knowledge, coordinating case discussions, and strengthening cross-team troubleshooting.
- Mentored technical leads, engineers, and non-technical team members moving into technical roles through case reviews, knowledge sharing, and interview support.
- Increased team productivity from 0.30 to 0.50 incidents per day and improved survey response rate from 8% to 15% while maintaining 4.9/5.0 CSAT.

TECH INTERNSHIP | MANITOU SCHOOL DISTRICT | 02/2021 - 05/2021

- Supported high school and middle school programming classes covering Java, JavaScript, and Game Maker Language (GML).

SKILLS & ABILITIES

Cloud & Microsoft 365: Azure IaaS/PaaS, App Services, Functions, Container Apps, Static Web Apps, Entra ID, Microsoft 365, Exchange Online, Teams, Outlook, SharePoint/OneDrive concepts, Microsoft Sentinel, Key Vault, KQL, Application Insights

Identity & Access: Active Directory Users and Computers (ADUC), Entra ID, IAM, hybrid identity troubleshooting, group membership, dynamic distribution lists, distribution groups, licensing, mailbox/recipient validation, password/account recovery

Endpoint & Infrastructure: Windows support, Intune/Autopilot, device provisioning concepts, BitLocker, printers, shared devices, docking stations, classroom/lab technology, basic network troubleshooting, hardware triage

Automation & Scripting: PowerShell, Azure CLI, Bash, Python, C#, Java, JavaScript, Terraform, ARM templates, Bicep, Git/GitHub, Azure DevOps

Tools & Troubleshooting: ADUC, Exchange admin, Entra admin, Intune admin, Azure admin, Wireshark, Fiddler, Postman, Visual Studio Code, Jira, documentation tools, Microsoft Copilot

Communication & Leadership: Customer support, technical writing, escalation management, process improvement, mentoring, active listening, critical thinking, stakeholder communication
